

6" AMT Trailer Mounted Trash Pumps run by Honda GX 660 Engine QTY:2

- DOT-approved trailer provides maximum portability
- Heavy-duty corrosion-resistant stainless steel impeller
- Runs for 9 hours on 1 fuel tank

Use these self-priming, engine-driven trash pumps for applications with solids up to 3" Dia, and flows up to 1,000 gpm. They feature heavy-duty cast aluminum construction with cast iron and stainless steel internal parts for wear resistance and durability, and a seal wash feature for extended mechanical seal life. Patented slide mechanism allows a single operator to slide the entire engine, fuel tank and pump rotating assembly backwards for easy seal changes. Large cleanout cover on the front of the pump allows quick access in the event of a clog.
